### **DIVERSITY & INCLUSION**

**Diversity** is any dimension that can be used to differentiate groups and people from one another.

It's about empowering people by respecting and appreciating what makes them different, in terms of age, gender, ethnicity, religion, disability, sexual orientation, education, and national origin.

**Inclusion** is a sense of belonging. Inclusive cultures make people feel respected and valued for who they are as an individual or group.

People feel a level of supportive energy and commitment from others so that they can do their best at work.
